EXHIBIT D - Revised 6/24/2008

█ Beit Rabban
█ Toddler
█ Congregation

Source : May 13, 2008 Statement at 12, AKRF May 13, 2008 at 6 and 7f.

Exhibit D shows existing and proposed classroom usage for each day of the week. Red is Beit Rabban, Green is "Toddler" (which may be Beit Rabban or CSI), and Green is CSI.

Source information can be found in the Programmatic drawings submitted by the Congregation on December 21, 2007; May 13, 2008 Statement at 12, AKRF May 13, 2008 at 6 and 7f.

As this demonstrates, Beit Rabban is and will continue to be by far the largest user of CSI classroom space on weekdays.

Further, it shows with great clarity that, by comparison, CSI's classroom usage is trivial, both in terms of the numbers of people and the hours of usage.

The Green columns to the left show the Toddler usage, which on Weekdays in predominantly Beit Rabban.

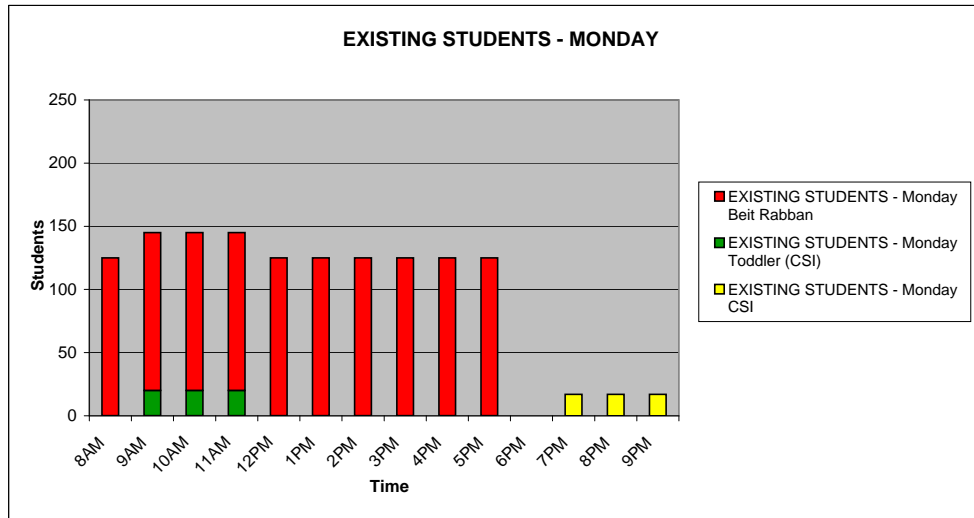

The Drawings submitted by CSI on May 13, 2008 allocate the grade levels for the classrooms on floors 3 and 4. There are not adequate classrooms for younger children grades 1 and below to accommodate the Beit Rabban programs on floors 3 and 4.

In any event, combining Toddler (yellow) and Congregation (green) usage and comparing to Beit Rabban (red), these chart visualize that Beit Rabban is the driving user of the space, not the Congregation.

EXHIBIT D - Revised 6/24/2008

Conclusion: On Monday, at the existing time, the dominant user of the classroom facilities is Beit Rabban. .

EXISTING STUDENTS - Monday			
	CSI	Toddler (CSI)	Beit Rabban
8AM	0	0	125
9AM	0	20	125
10AM	0	20	125
11AM	0	20	125
12PM	0	0	125
